

Pepperino[®]

training spray - clean refill

TRAINING SPRAY SYSTEM

The sustainable alternative

NO MORE DISPOSABLE CANISTERS

Disposable canisters have been used up to now to train with pepper spray. This does have a few drawbacks since these canisters do represent a significant burden on the environment and they do not fit in within a policy that focuses on sustainability. Moreover, you, as the customer, are dependent on delivery times. AUTRON can now offer a solution through the introduction of its Pepperino due to its innovative use of existing and proven technology. A sound alternative for the disposable canister because this new system will allow you to easily refill pepper spray training canisters after use. The Pepperino is a cost-saving, environmentally-friendly and sustainable product with which you will no longer be dependent on delivery times.

Before Autron developed the Pepperino, it carried out research amongst user groups. The results of the research, the applicable environmental requirements and the most recent technological possibilities form the basis for the Pepperino. This new product of Autron provides the highest level of flexibility, safety and certainty for the user and the lowest costs for the budget holder.

CLEAN REFILL FOR SAFETY AND CERTAINTY

The system always provides the same quantity of purified water and compressed air through a unique connection (nipple) in the training canister. It goes without saying that the training canisters completely meet training criteria with regard to directional behaviour and scope. The use of Pepperino training spray is also completely safe and the Clean refill does not contain any alcohol.

SUSTAINABLE TECHNOLOGY FOR PERFECT QUALITY

The innovative Pepperino has a unique valve-nipple combination and an extremely smart filling regulator. Two parallel filling openings ensure short filling times. The system is housed in a compact and easily portable housing.

PEPPERINO, THE SOUND AND RELIABLE REFILL SYSTEM

SAFE AND SUSTAINABLE

- » Clean refill of pure water without alcohol
- » Clean refill is absolutely legionella-free
- » No burden on the environment
- » Reliable and sustainable technology

EFFICIENT

- » No investments
- » You only pay for each refill
- » Cost-savings due to refilling

EASY

- » The Pepperino is easy to operate
- » The system can be flexibly deployed in multiple rooms

Proper training is the key for success

It is therefore essential for training to take place in facilities which maximize the training potential and stimulate the simulation process.

You will always have sufficient Clean refill with the Pepperino.

The unique Pepperino filling nipple.

One press of the button is sufficient to refill.

IT HAS PROVEN ITS WORTH IN PRACTICE

The Pepperino has been extensively tested in practice and has more than proven its worth. The system is the solution for every pepper spray training course where safety, the environment and cost-savings are concerned. Contact us today if you wish to find out more about the Pepperino and the use of the system at your training centre.

TECHNICAL DATA

Filling nipple:	2 items in parallel
Training canister	
filling time:	20 seconds
Electrical connection:	220 V AC 0,25 kW / 1,67A
Dimensions:	lxhwx 800 x 935 x 414 mm
Weight:	75 kg
